Programming

History

History

- Python is an interpreted, high-level, general-purpose programming language.

- 1994 -----> v1.0
- 2000 -----> v2.0
- 2008 -----> v3.0
- 2019 -----> v3.8

Guido Van Rossum

Why python?

Why python ?

- Python is easy to learn and develop.
- Supports Object Oriented Programming.
- Platform independent.
- More number of Libraries.
- Developer community and open source.
- Develop different type of applications like web applications, Internet of Things, ML, Data Science and AI.

Why python

Hiring during the virus: These are

moneycontrol.com/news/business/economy/hiring-during-the-virus-these-are-the-top-10-in-demand-skills-in-india-now-5250501.html

Home | Coronavirus | News | Markets | Mutual Funds | Commodities | Insurance | Video | Podcast | Personal Finance | Portfolio | Forum | Be a Pro | Earth360 | Easybiz | Live TV

have caused uncertainties on the country's job market, but the demand for niche job skills has not dried up. Corporates are hiring talent to select roles that require specialised certifications in niche skills across business segments.

Moneycontrol gives you a lowdown on the top 10 skills in demand across Indian corporates in times of COVID-19:

Python programming language

Python is the second most loved programming language, according to StackOverflow developer survey, and for a reason. It is easier to learn, efficient and is usually the programming language taught in schools and colleges.

So it is one of the most preferred languages for data scientists, Artificial

Recommended Approach
Anaconda3 5.1.0 (64-bit) Setup
ANACONDA
Advanced Installation Options
Customize how Anaconda integrates with Windows
Advanced Options
1
Add Anaconda to my PATH environment variable
Not recommended. Instead, open Anaconda with the Windows Start menu and select "Anaconda (64-bit)". This "add to PATH" option makes Anaconda get found before previously installed software, but may cause problems requiring you to uninstall and reinstall Anaconda.
Register Anaconda as my default Python 3.6
This will allow other programs, such as Python Tools for Visual Studio PyCharm, Wing IDE, PyDev, and MSI binary packages, to automatically detect Anaconda as the primary Python 3.6 on the system.
